

PETITJEAN

FIXED EQUIPMENT CIRCULAR PLATFORMS

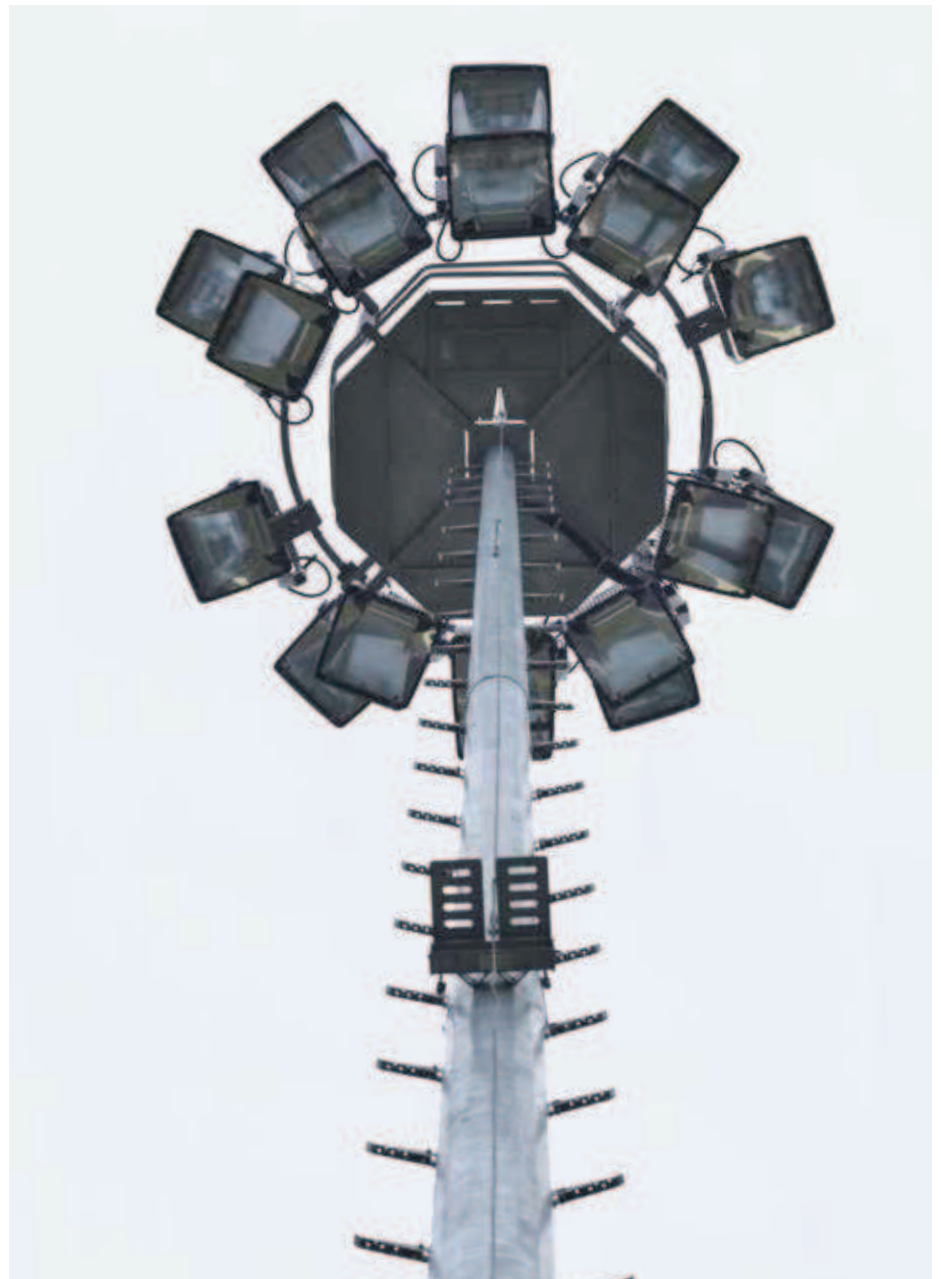

DESCRIPTION | DECISIVE ADVANTAGES

Circular platform is particularly suited to a 360° lighting of wide outdoor spaces. Platform is mounted on high mast top.

The center octagonal maintenance platform can hold up to 2 persons for floodlights maintenance operations. This maintenance platform is also spacious (2.68m²) and secure, in compliance with standards.

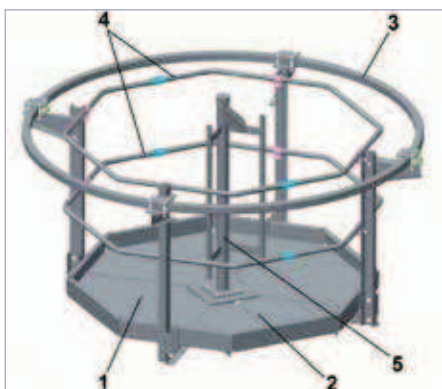

A Ø2.4m ring around the platform allows to mount up to 20 sitting and hanging floodlights.

TECHNICAL DESCRIPTION

- Bolted on an welded plate at the top of the mast
- Suitable for masts with top diameter between 160 and 310 mm
- A central stem on the maintenance platform allows safety cable securing.
- Electrical cables come out of the mast under the platform by 1 or 2 Ø101 mm steel tubes. .

- 1 1675 mm wide non-slipping floor
- 2 platform access hatch
- 3 floodlights fixing ring
- 4 railing posts
- 5 central stem for safety cable

Lighting configurations:

- Single-side lighting
- Two-sides lighting
- Circular lighting

PFC15/12 with 5 hanging floodlights on a single-side

PFC15/12 with 5 sitting and 5 hanging floodlights on a single-side

PFC15/12 with 6 sitting and 6 hanging floodlights on two sides.

PFC15/12 with 10 sitting floodlights 360° arrangement

PFC15/12 with 10 sitting and 10 hanging floodlights - 360° arrangement

COMPLIANCE

Our platforms are in compliance with NFE 85014 standards (industrial equipment elements, work platforms).
